# WHO WE ARE

**Passion, skill and creativity characterize our activity and we have been established on the market for years now.**

Our company was established in 1987, but it has a long family tradition. In the 60s, starting as photographers, we became printers, producing : business cards, catalogs, brochures, posters etc. etc..

The birth of the first food companies and manufacturing companies in the area, led us to explore a new area: that of packaging. By the start of the century we had made considerable investment in equipment and know- how.

Alongside the traditional paper products, we created our logo "Christmas Boxes" which with the annual output of a complete catalog distributed throughout Italy and in several European countries, allows us to address new markets.

We specialize in any type of packaging, using every kind of paperboard, printed or neutral, treated with UV/Offset/water varnishes or PVC.

Cases, containers, displays, pallboxes, crowners, window signs.

No constraints of minimum or maximum amount of production and versatility of organization, allow us to be highly competitive in the market.

Our photolithography unit allows us to create new packaging to meet your needs. The production cycle takes place entirely within our company, thanks to the availability of modern and cost-saving machinery.

# MATERIALS THAT WE USE

**Paper, cardboard, paperboard and pvc: all for best packaging.**

Materials that we use are:

- **RECYCLED NATIONAL CARDBOARD.**
- **RECYCLED CARDBOARD WITH WHITE BACK.**
- **RECYCLED FOOD CARDBOARD WITH GRAY/WHITE AND BROWN BACK.**
- **FULLY COATED PULP PAPERBOARD GC1 AND GC2 .**
- **CARDBOARD WITH KRAFT BACK (FRÖVI) FOR FOOD AND DRINK CLUSTERS.**
- **COATED PAPER FOR PRINTING ALL KINDS OF CATALOGS, BOOKS, EDITIONS.**
- **CARDBOARD OF ANY QUALITY: MICROWAVE F/E, B WAVE/ MICROTRIPLE, EACH ONE COUPLED TO PAPERBOARD.**
- **PVC/ PET/POLYPROPYLENE FOR LAMINATING AND WINDOWS.**
- **TRADITIONAL AND FOOD INKS. FLUORESCENT AND (ON DEMAND) SCENTED INKS TO EMPHASIZE AND ENHANCE THE CONTENT.**

Flatbed BOBST die-cutters.

# Window-patche

For film application on cases.

## Folder-glueers

Suitable for gluing cartons, cases in line and with complex bonding glue to 6 points. Machine with collector.

## Equipment for manual gluing

# THE NEW ALTERNATIVE

# PACKAGING

Gloss-mat MAM is the new treatment products to create fully recyclable cardboard.

Glossy-mat MAM is therefore an alternative to treatments of lamination and UV coating that meets the European and Italian regulation on the reduction of packaging waste.

Glossy and Mat packaging similar to plastic packaging but completely environmentally friendly.
